

Total Freedom

Simple Collaboration

Complex Coordination

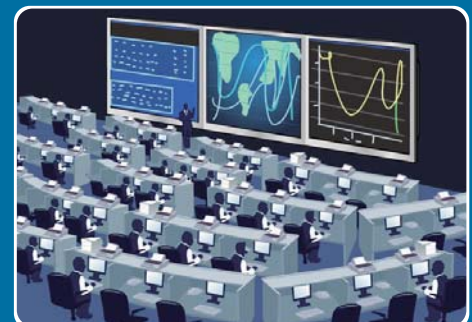

The *New Generation* Project Management Tool is about accommodating different management styles for different situations.

8thManage[®] PM

Transparency to promote cross supervision and help managers maintain control

Timely & Accurate Information for effective judgment

Situational Project Management

- Choose the Practices Suitable for Your Situation

8thManage® PM helps organizations manage small, unstructured projects to large, highly-sophisticated projects

8thManage® PM supports traditional techniques such as WBS, scope structure, Gantt chart, critical path, EVM as well as modern techniques such as Iterative Dependency and Reality Check

Enterprise Collaboration

8thManage® PM provides the foundation for individual and group coordination and interaction

- Functional and project-oriented organization management
- Common language for request, commit, deliver and accept
- Group, committee and site coordination and management
- Client, partner and supplier coordination and management
- Inter-organization interaction and escalation management

Enterprise Program Management

8thManage® PM and 8thManage® PMO together provide complete coverage for managing portfolio of projects

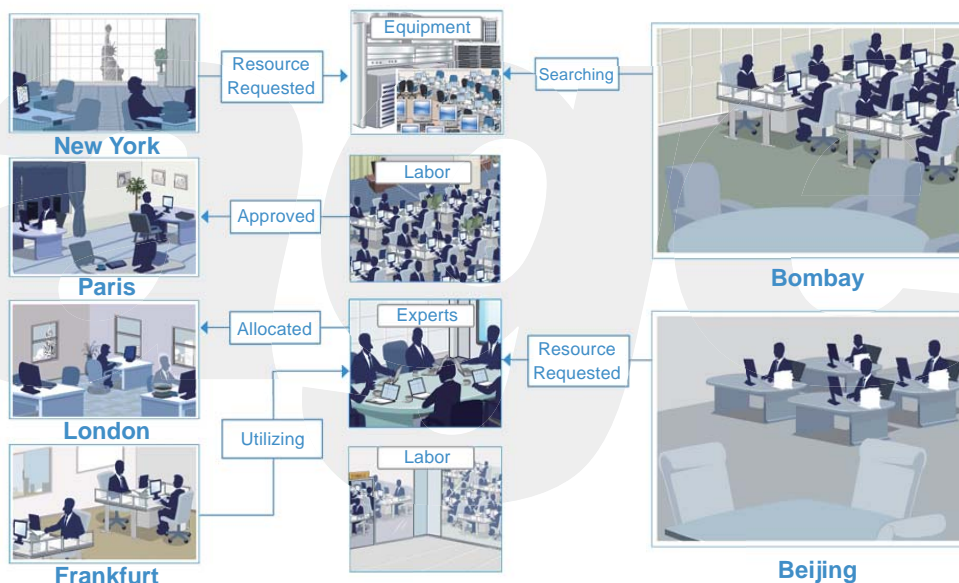

- Standard cost classifications and automated financial consolidation and reporting
- Multi-organizational accountability
- Policy enforcement in enterprise, PMO and project levels
- Information transparency
- Aggregated scope and milestone management
- Cost management in PMO and project levels
- Change request management in PMO and project levels
- Aggregated issue and risk management

Enterprise Resource Management

8thManage® PM provides features for searching, requesting, allocating and tracking of resources in multiple sites, groups, PMOs, projects and activities

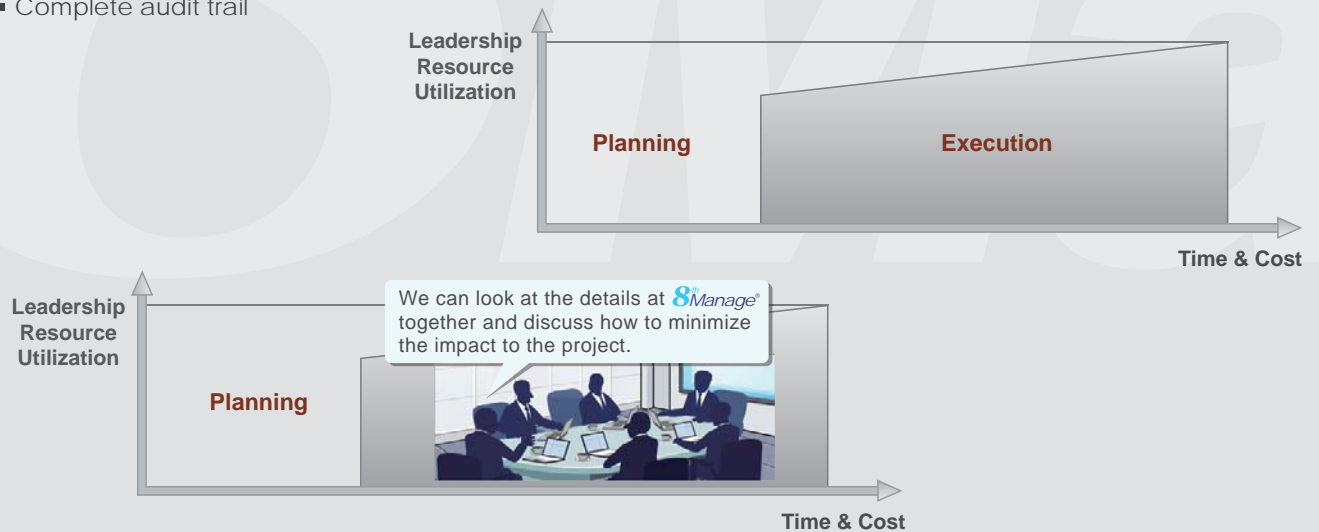

- Automated resource search across sites and groups based on skill and availability
- Resource allocation automates cost estimating and budgeting
- Comparison of resource plan vs. actual utilization
- Detection of overloaded and inadequate resources
- Aggregation of enterprise data into portfolio views to identify critical issues and balance risks across initiatives

Project Execution Management

8thManage® PM allows full traceability of project execution

- Activity scheduling and execution management
- Deliverable scheduling and handoff management
- Dependency scheduling, tracking and acceptance management
- Project and activity approval and re-approval management
- Real-time request and response management
- Real-time risk and problem detection
- Execution policy and control management
- Complete audit trail

Commitment Management

8thManage® PM provides comprehensive support for 1-way and 2-way project commitments

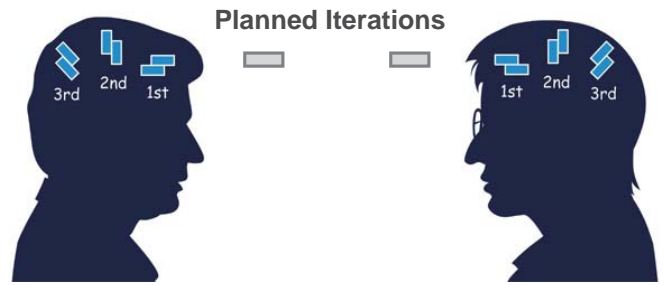

- Commitment proposal for activity, deliverable and resource
- Commitment record for schedule, cost and quality commitments
- Commitment protocols for proposing, approving and accepting commitments
- Commitment cancellation, fulfillment and breakage management
- Commitment track record management

Predictable Commitment via Our Patent Pending Protocol

Requirements and Iteration Management

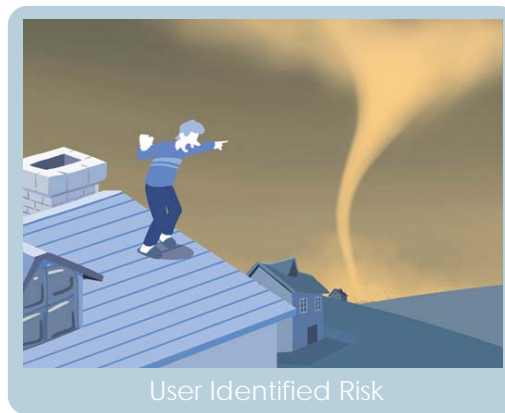

It is difficult to communicate complex requirements in a single exchange. 8thManage® PM fosters an iterative approach to delivery and acceptance of complex requirements

Risk Management

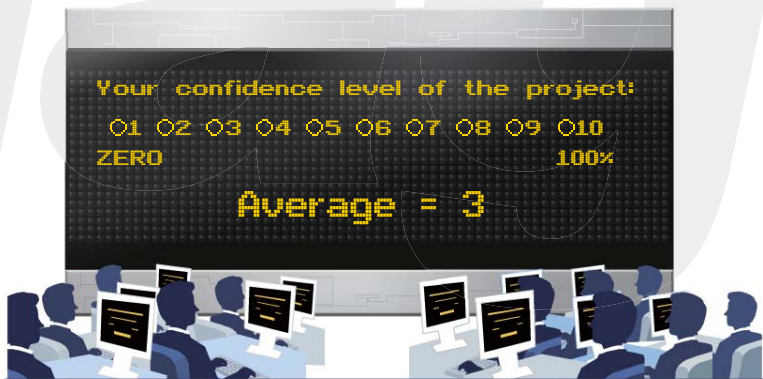

8thManage® PM automatically detects systemic risks and provides an integrated risk register for recording user-identified risks and tracking them to closure

- Automatic detection of schedule and cost overrun risks
- Automatic detection of resource inadequacy and shortfall risks
- Automatic detection of deliverable review and acceptance risks
- Automatic detection of control and confidence risks
- Recording of user defined risks and tracking of mitigation actions
- Risk criteria definition and analysis matrix

Reality Check

8thManage® PM facilitates pulse taking for the project systematically

- Sponsor and team's confidence
- Stakeholders' consensus
- User satisfaction

Communication and Issue Management

8thManage® PM provides various communication mechanisms and a centralized issue management system to track issues and action items to closure
